EDUCATION

Coventry University

BSc Hons Computing, Computer Science; GPA: 3.75

Coventry, England, United Kingdom

October 2019 -November 2022

SKILLS SUMMARY

- **Languages:** Python, Javascript, Dart
- **Frameworks:** Flutter, FastAPI, Panda, Matplotlib, NextJs
- **Tools:** Power BI, Excel, PowerPoint, Tableau, MySQL, SQLite
- **Platforms:** PyCharm, Jupyter Notebook, Visual Studio Code, IntelliJ IDEA
- **Soft Skills:** Rapport Building, Strong Stakeholder management, People Management, Excellent communication

WORK EXPERIENCE

Flutter Developer

Sajilo Ventures Pvt Ltd

December 2022 -January 2024

Developed and maintained cross-platform mobile applications using Flutter and Dart for Android and iOS platforms. Built responsive and intuitive user interfaces, integrated RESTful APIs, and collaborated with backend developers to ensure seamless data flow. Optimized application performance by debugging issues, improving code quality, and implementing reusable components while working closely with designers and QA teams to deliver high-quality releases.

Software Engineer

Wesionary Team Co. Ltd

March 2024 -Present

Design and develop scalable mobile applications using Flutter with a focus on clean architecture, performance, and maintainability. Implement new features, integrate RESTful APIs, and manage application state while following industry best practices and coding standards. Collaborate with cross-functional teams to analyze requirements, troubleshoot production issues, and deliver reliable, high-quality applications within project timelines.

PROJECTS

Property Management app

December 23 - Janaury2024

Developed a cross-platform property management application using Flutter that enables users to buy, sell, and browse real estate listings. Implemented features such as property search, detailed listings, user authentication, and REST API integration to provide a seamless and responsive user experience. Collaborated with the backend team to ensure efficient data management and smooth application performance.

Soudan | Fortune app

March 2024 - April 2025

Built a Flutter-based fortune application that allows users to book tarot readings, counseling sessions, astrology consultations, and other spiritual services. Integrated secure user authentication, appointment booking, payment workflows, and real-time notifications to enhance user engagement. Focused on creating an intuitive UI and optimizing app performance for a smooth booking experience.

Easysheet| Data analysis system

July 23 - August 2023

Developed a data analysis platform that enables users to perform data manipulation, generate interactive charts, and visualize datasets efficiently. Implemented features for data import, filtering, sorting, aggregation, and dynamic chart creation to simplify data analysis workflows. Designed the application with a user-friendly interface and optimized processing to handle large datasets effectively.

CERTIFICATES

Programming in Dart and Flutter Bootcamp| CERTIFICATE

March 2021

Gained a solid foundation in Dart programming and Flutter for building cross-platform mobile applications. Learned to create responsive user interfaces, manage application state, and integrate APIs using Flutter.

FastAPI| CERTIFICATE

July 2025

Learned to develop high-performance RESTful APIs using FastAPI and Python with modern backend development practices. Gained hands-on experience in request validation, database integration, authentication, and API documentation.

Prompt Engineering | CERTIFICATE

December 2025

Developed the ability to design effective prompts for large language models to generate accurate and relevant responses. Learned prompt optimization techniques and AI workflows to improve productivity with generative AI tools.
